Amba Enterprises

A renowned name in the field of Energies & Utilities takes pride in introducing...

HITEK OVENS

The high technology ovens with huge savings

Hitek Ovens are available in 2 models:

- Rotary Trolley Ovens
- Deck Ovens

Unique Distinguishing Features...

Our Hitek Ovens offer the following distinctive advantages over other conventional Ovens:

- Unique and Compact design of the heat exchanger results in lesser floor space requirements, low fuel consumption & hence huge savings
- Available with either Gas / Fuel Burners
- Give continuous uninterrupted production
- Baking premises remain very clean since there is no smoke or ash unlike firewood oven.
- Due to re-circulation of hot air & use of very efficient imported Burner, cost of fuel is much lower than that of firewood or electric oven.
- Uniform Air Circulation & Even Quality of Baking is ensured all round the rack due to -
  - I) Exclusive design of the heat exchanger
  - II) More than one fan inside the baking area -
    - a) In Deck Ovens - One Individual fan is provided per deck
    - b) In Rotary Ovens - There are **four fans inside the baking place

    However in case of Conventional Ovens there is only one common fan for all decks
  - III) In Rotary Ovens - Rotation of the trolley presents each side of the tray to a double system of hot air vents

NOTE:

1) **No. of fans in case of Rotary Ovens depend upon the Oven size & design

TYPE / MODEL		Rotary Oven				Deck Oven			
		HOR 60	HOR 90	HOR 200	HOR 400	HOD 60	HOD 90	HOD 200	HOD 400
No of Decks (in case of Deck Oven)		-	-	-	-	2 Deck	3 Deck	3 Deck	4 Deck
Fuel Consumption in Kg / Hr		1	1.25	3	5	1	1.25	3	5
Connected Power in HP		1	1	3	5	1	1	3	5
Overall Dimensions	L	56	56	102	158	56	56	102	158
	W	39	39	68	100	39	39	68	100
	H	36	36	80	108	36	36	80	108
Working Area	L	48	48	92	146	24	24	48	48
	W	24	24	48	72	48	48	92	92
	H	36	36	72	108	7	7	7	7
